

# 9

## **INTEGRATED FOOD STANDARDS - QUICK ACCESS SYSTEM**

### **IFS. QuickAccess**

- Integration of all food standards
- One-point source for easy and quick access
- Elimination of ambiguity in interpretation

To integrate all food related standards and provide a quick access to the vertical as well as horizontal standards, FSSAI is developing a real time web based information system for the use of all stake holders in the food arena. Once developed, this system would enable all the relevant information about any product on a single screen.

## Integration of the Standards

This system would integrate the standards provided in following regulations:

- Food Safety and Standards (Food Product Standards and Food Additives) Regulations, 2011;
- Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011.
- Food Safety and Standards (Packaging and Labelling) Regulations, 2011;
- This would also align with the following regulations:
- Food Safety and Standards (Licensing and Registration of Food businesses) Regulations, 2011;
- Food Safety and Standards (Prohibition and Restriction on Sales) Regulations, 2011;
- Food Safety and Standards (Laboratory and Sampling Analysis) Regulations, 2011.

## Improve Accessibility and Eliminate ambiguity

- This system once operationalized would eliminate ambiguity in interpretation of Regulation.
- This would facilitate the FBOs in smooth operation of their business.
- FSSAI also plans to integrate this system with laboratory management system in due course.
